Federal Communications Commission
Office of the Secretary

**Re: Applications for the Transfer of Control of Licenses and Authorizations
from AT&T Wireless Services, Inc. to Cingular Wireless Corporation (WT
Docket No. 04-70)**

Attached for inclusion in the record under seal in the above-entitled docket is information derived from the Numbering Resource Utilization and Forecast ("NRUF") reports filed by wireless telecommunications carriers for December 2001, December 2002, June 2003, and December 2003.

The information was developed from data provided by carriers to NeuStar, Inc., the North American Numbering Plan Administrator ("NANPA"), pursuant to Commission regulation. These data are collected by the NANPA so that it can inventory all numbering resources and develop area code and North American Numbering Plan exhaust projections. The data include, among other information, the Operating Company Number ("OCN") and name of the reporting carrier, and, for each block of 1000 telephone numbers given to the carrier, the quantity of telephone numbers in that block that are assigned to customers.

Using the area code and the central office code of the block of telephone numbers, the geographic location (*i.e.*, the rate center to which the number is associated) was identified. The geographic locations were then assigned to counties and aggregated at the county level for ease of analysis. The OCNs were used to confirm the identity of the wireless carriers (*i.e.* operating subsidiaries, affiliates, etc. were identified and then listed by their parents' names).

Two additional copies of this cover letter are enclosed for placement on the public record.

Sincerely,

William W. Kunze, Chief
Spectrum and Competition Policy Division
Wireless Telecommunications Bureau
